Checkpoint 13 Jacco 10-01-2023

**Verhees, Tim T.J.H.** a day ago

Only Controller tests, end to end and a final bit of authorization

Describe what goes well according to your teacher, what you should pay more attention to and what is your next step to achieve the learning outcomes...

Post Feedback

Checkpoint 12 Jacco 23-12-2022

⚠ No feedback submitted.

Checkpoint 11 Maja 23-12-2022

**Verhees, Tim T.J.H.** 21 days ago

OWASP is good

Research needs to be APA

Docker is succesfully deployed

Sign up is good but more feedback that when someone is logged in it shows it. (Example: name in the navbar)

Checkpoint 10 Jacco 16-12-2022

⚠ No feedback submitted.

Checkpoint 9 Jacco 13-12-2022

⚠ No feedback submitted.

**Checkpoint 8**   **Jacco**   06-12-2022**Verhees, Tim T.J.H.**   a month ago

We had a look at my progress so far. I'm behind on the work which is worrying, but not too far where it is impossible. We talked on testing and how a future workshop will help get my coverage higher. We also talked about the teacher's expectations for the research document, UX feedback and Test plan.

**Checkpoint 7**   **Ali**   17-11-2022**Verhees, Tim T.J.H.**   2 months ago

Talked about next semester and how I need to find an internship for it. Explained my strategy and showed off my template letter. Also discussed the progress in both the individual track and group track, and the difficulties both are bringing

**Checkpoint 6**   **Jacco**   15-11-2022**Verhees, Tim T.J.H.**   2 months ago

Front end looks good so far but more features need to be added, which include (but are not limited to) CI and sonarcube within pipeline. A finished research. Sonarcube also needs to be fixed.

**Checkpoint 5**   **Jacco**   14-10-2022**Verhees, Tim T.J.H.**   3 months ago

Feedback gekregen over hierarchie van software met tip over gebruik dictionaries. C4 laten zien, ongeveer zelfde feedback als Maja.

**Checkpoint 4**   **Maja**   14-10-2022**Verhees, Tim T.J.H.**   3 months ago

Communication back and front end is correct, c4 diagram needs work, c3 is good but c1,2 and 4 need to be changed. C1 needs to mention the external API, C2 should combine single page and web application and C4 needs to touch upon the hierarchy of Controller, Repository, Logic. The research questions are good and touch upon subjects that should be researched. I also gave my planning for the coming/current sprint and it seemed good.

**Checkpoint 3**   **Jacco**   30-09-2022**Verhees, Tim T.J.H.**   3 months ago

Showed what is done so far in terms of front- and backend. Clarification about the expectations in terms of C4 and SOLID, with a plan on what to do to meet the demands of the 2nd sprint.

**Checkpoint 2** Ali 08-09-2022**Verhees, Tim T.J.H.** 4 months ago

We discussed how I performed when giving a workshop in front of the class, for which the feedback was very positive. We also talked about how I have some difficulties with the technical part of the semester, for this feedback was given in terms of what I should expect. Another topic brought up was the possibility for an internship into teaching, seeing as that is my goal. We discussed Student+ and how I've enrolled into it. To summarize the feedback I was given is to not put too high expectations for myself and put less emphasis on help from the teachers and more from Google.

**Checkpoint 1** Jacco 06-09-2022**Verhees, Tim T.J.H.** 4 months ago

Plan looks okay so far and whilst needing more fleshing out, the idea for the project was okay. I brought up my difficulties with the assignments and I was sent a zip file containing the information from semester 2 to help out. Clarified the expected products to be turned in for Sprint 1.
